DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a bag, classified in class 383, subclass 117.
 - II. Claim 2, drawn to a method of making a bag, classified in class 493, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as heat-sealing the strips of thermoplastic resin to the first and/or second sections of fabric prior to forming the first and second sections of fabric into a prepared sheet.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Examiner Jes Pascua and applicant's representative, Mr. Myers, on 8/29/02 a provisional election was made with traverse to prosecute the invention of Group II, claim 2. Affirmation of this election must be made by applicant in replying to this Office action. Claim 1 has been withdrawn from further

consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Trewella et al (US 3,338,019).

Trewella discloses the invention as claimed including forming a sheet by longitudinally sealing sheet 11, to sheet 12, folding sheets 11 and 12 and sealing seams 25 through the use of an adhesive and heat (see Figs. 1-4, 11, 12, C1, L50 – C2, L7 and C3, L45-59).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Detrie, Bellezanne, Becker et al, Wicks, Weimar, Makowka, Bowman, Vetter, Smith, Moseley et al and Singh have been cited to show devices having similar structure.
